DETAILED ACTION

This action is in response to the amendment filed on 10/10/2007.

Claims 1-4, 6-15, 17-21 are allowed.

Claims 5 and 16 are cancelled with this examiner's amendment.

Claims 1, 5, 6, 11, 16, and 21 are amended with this examiner's amendment.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kirk Houser [Reg. No. 37,357] on December 18, 2007.

In the claims

Please amend claims 1, 5, 6, 11, 16, and 21 as follows.

1. (currently amended) A method for secure installation and operation of software, said method comprising:

employing a New Technology File Structure logical volume;
employing an installer;

writing a Primary Data Stream file to said New Technology File Structure logical volume from said installer;

associating data with said Primary Data Stream file; and

writing said associated data to said New Technology File Structure logical volume as an Alternate Data Stream file from said installer[.];

creating a Primary Data Stream directory chain;

writing said Primary Data Stream directory chain to said New Technology File Structure logical volume from said installer;

writing said Primary Data Stream file to said Primary Data Stream directory chain in said New Technology File Structure logical volume from said installer;

associating said data with said Primary Data Stream directory chain or said Primary Data Stream file by creating and closing said Alternate Data Stream file; and

installing said associated data to said New Technology File Structure logical volume as said Alternate Data Stream file from said installer.

Claim 5 (cancelled),

Claim 6 (currently amended),

At line 1, delete [Claim 5] and add --Claim 1--.

11. **(currently amended)** A computer system for secure installation and operation of software, said computer system comprising:

a processor;

a first drive adapted for access by said processor;

a second drive adapted for access by said processor, said second drive including a New Technology File Structure logical volume; and

an installer operatively associated with said first drive, said installer cooperating with said processor to write a Primary Data Stream file to said New Technology File Structure logical volume, associate data with said Primary Data Stream file, and write said associated data to said New Technology File Structure logical volume as an Alternate Data Stream file[.]; and

wherein said installer cooperates with said processor to create a Primary Data Stream directory chain, to write said Primary Data Stream directory chain to said New Technology File Structure logical volume, to write said Primary Data Stream file to said Primary Data Stream directory chain in said New Technology File Structure logical volume, to associate said data with said Primary Data Stream directory chain or said Primary Data Stream file, and to install said associated

data to said New Technology File Structure logical volume as said Alternate Data Stream file.

Claim 16 (cancelled),

21. **(currently amended)** A method for secure installation and operation of software, said method comprising:

employing a computer-readable medium including a New Technology File Structure logical volume;

employing an installer;

writing a Primary Data Stream file to said New Technology File

Structure logical volume of said computer-readable medium from said installer;

associating data with said Primary Data Stream file; and

writing said associated data to said New Technology File Structure

logical volume of said computer-readable medium as an Alternate Data Stream file from said

installer[.];

creating a Primary Data Stream directory chain;

writing said Primary Data Stream directory chain to said New Technology File Structure logical volume from said installer;

writing said Primary Data Stream file to said Primary Data Stream directory chain in said New Technology File Structure logical volume from said installer;

associating said data with said Primary Data Stream directory chain or said Primary Data Stream file by creating and closing said Alternate Data Stream file; and

installing said associated data to said New Technology File Structure logical volume as said Alternate Data Stream file from said installer.
